

A close-up photograph of a green wheat stalk with a golden ear, set against a blurred background of more wheat, symbolizing sustainability and natural growth.

SUSTAINABILITY

GREENGUARD

At DE Design, our commitment is to continuously seek new and improved ways to reduce our impact on the planet. From our manufacturing facilities, through our processes and product, to how they affect your work, leisure or learning environments, our promise is to tread lightly. This is why we have worked diligently to ensure each of the products in our collection has achieved GREENGUARD Internal Air Quality certification. The certificates may be sourced through www.greenguard.org. Simply go to this website and search DE Design.

ATTRIBUTES of standard laminate materials

Recycled content

- Pre-consumer: 80% - 85%

Regional content

- The origin and extraction location of raw materials has been documented for 80% - 85% of the final board weight ratio.

FSC Certification – when specified

CARB 93120 – phase 2 compliant

Performance tests

- ANSI A208.1-2009 / ASTM E84

Our Promise

At DE Design Corp., our commitment is to continuously seek new and improved ways to reduce our impact on the planet. From our manufacturing facilities, through our processes and product, to how they affect your work, leisure or learning environments, our promise is to tread lightly.

LEED®

DE Design Corp. has set out to demonstrate how its products can meet the current LEED® rating for Materials & Resources (MR) and Indoor Environmental Quality (EQ). The categories listed below have been found to be worthy of points as applied to the LEED® ratings based on DE's manufactured product. Additional points may be awarded provided certain buyer/end user criteria are met.

LEED® v4 Building Design + Construction
LEED® v4 Interior Design + Construction

Materials & Resources

MR 4.1: Recycled Content – 10%

MR 4.2: Recycled Content – 20%

MR 5.1: Regional Materials – 20% manufactured regionally

MR 5.2: Regional Materials – 10% extracted and manufactured regionally
(Dependent on project location)

MR 7.0: Certified Wood – (when specified)

Indoor Environmental Quality

EQ 4.5: Low-emitting Materials
